

INNOVATIVE PRODUCTS FOR THE LOADING DOCK INDUSTRY

# SAFETY STRAP™

Patent Pending

## Retractable Dock Door Strap

### Keep Your Dock Workers Safe

- Designed for cross docks and facilities that leave their dock doors open
- Designed with superior strength that exceeds OSHA standards
- High visibility dock barrier
- Helps prevent dock workers from falling off a loading dock
- Strap is retractable to keep clear of door opening when not in use

Can be incorporated with DL Manufacturing's Dock Communication Systems, or used as a stand alone unit

The Smart Choice for facilities that keep their loading dock areas open

Optional proximity sensor detects that the strap is engaged when used with Safety Signal™ or Smart Chock™

### Incorporate Safety Strap with Smart Chock or Safety Signal to help reduce the potential for dock accidents and improve production

#### Safety Strap and Safety Signal communication system setup

The Safety Strap with optional proximity sensor can be used with Safety Signal at facilities that typically keep their doors open.

<b>Strap Engaged:</b>	<b>Strap Disengaged:</b>
Inside Box Red	Inside Box Green
Outside Box Green	Outside box Red
Versa Light* OFF	Versa Light* ON
Auxiliary Output OFF	Auxiliary Output ON

\*Versa Light optional

#### Safety Strap and Smart Chock communication system setup

When supplied with optional proximity sensor, Safety Strap can be integrated with Smart Chock. The Safety Strap replaces the function of the dock door opening and closing when the facility operates with the loading dock doors open.

#### Model 200 Specifications:

- Includes proximity sensor to incorporate with Safety Signal or Smart Chock
- Powder coated steel housing
- High strength durable nylon strap
- Spring loaded retractable with soft recoil
- Fits up to 10' doors

#### Model 201 Specifications:

- Powder coated steel housing
- High strength durable nylon strap
- Spring loaded retractable with soft recoil
- Fits up to 10' doors
