

Custom Swing Gate for Outdoor Loading Dock
Warehouse

Scarborough, ON

Project Overview

This warehouse in Scarborough had safety concern having forklifts operating around a dock plate. This outdoor loading dock did not have any safety barriers so there was a concern that forklifts could easily drive over the edge.

To improve safety at this warehouse, we designed and installed a custom made swing gate for this outdoor loading dock. This steel swing gate will be able to stop forklifts from driving over the edge.

✓ Improve safety

✓ Operational efficiency
