

221 Overhead Doors with Track Guards
iPort Caledon Business Park with TriAxis Construction

Caledon, ON

Project Overview

We worked TriAxis Construction to supply and install a total of 221 overhead doors for the newly constructed LEED certified industrial buildings for iPort Caledon Business Park:

- (215) 9'x10' full vertical lift [C175 overhead dock doors](#) with LiftMaster Model DD08900W operators
- (6) 12'x14' full vertical lift [C175 overhead drive-in doors](#) with OSH 3/4 HP and chain hoist
- (221) sets of 48" high track guards for each door

The C175 sectional overhead doors are both suited for dock or drive-in doors up to 36'x22'. They feature:

- Hot dip galvanized stucco embossed and ribbed enforce steel sheet
- Two coats, baked-on paint system, primer and polyester white finish coat.
- An R-value of R-16.
- A continuous polyurethane production line utilizing the latest in rigid foam technology.
- 1-3/4" thick panels.
- A 24"x12" vision window is included in the 3rd panel to let in natural light and create a brighter space.
- 3" track and hardware with full vertical lift track.
- 48" high track guards to protect the door tracks from accidental impacts.
- 1" solid shaft with 10,000 cycle-rated springs.
- Continuous angle mount to steel.
- Full perimeter weather seal to seal out pests, drafts and white light while sealing in energy savings.

- ✓ Workplace productivity
- ✓ Long lasting
- ✓ Improve safety
- ✓ Natural light
